SlaveMouse Free Download For PC

SlaveMouse is a simple software that makes your mouse move and click automatically on locations that you defined. This software is an independent system. i.e. The mouse moves and clicks automatically, but it doesn't depend on the mouse drivers. The purpose of SlaveMouse is to make it easier for disabled people to use a keyboard/mouse and by using it you provide them with a very small help. With this application your mouse is just the way you want it to be... Why use it? • Minimize the effort needed to achieve desired results • Eases repeated and tedious tasks • Does not require specific training, i.e. works with any mouse • Minimal 'handovers' necessary • More efficient system • Saves time and save energy • The mouse will continue to work in another application if you move away from that application • It doesn't depend on mouse drivers • Makes it easier to solve little problems (keyboard etc...) • Simple to use • Removes the possibility of getting tempted to type or use a mouse in an incorrect manner • Poses no danger to your system • Allows you to use a normal mouse • It will not slow down or occupy any other program that you are currently using • Enhanced pointer consistency • SlaveMouse will not work if you have your mouse connected by wire, only by wireless protocol • SlaveMouse will work as long as the mouse is connected, not as long as it is connected to the computer • Your mouse will not stop working if you lose power (e.g. laptop computer) • This is an independent system • SlaveMouse does not conflict with your mouse drivers • It is not a virus or an infection • You can add or delete what you like • You can change the sensitivity, button mapping and/or the colors • You can change the minimum distance that the mouse will move before making a click (0 = no minimum distance). • You can choose the maximum distance that the mouse will move before making a click (0 = no maximum distance). • You can set the maximum number of motions that the mouse will make in one session and the minimum number of moves per session • You can choose to write the program code or use 'drag-and-drop' • You can convert the input to that of your keyboard • You can set the default action that the mouse will perform. (Left-click by default) • You

SlaveMouse Free License Key [Mac/Win] [Latest] 2022

SlaveMouse is a software that controls the mouse movements. You can define the X and Y position where your mouse should move and click. Example: The program recognizes the position of a mouse button and start moving the mouse on that position. When the mouse button is released the program will click on that position. Using this software you can automate workflows in MS Office (Microsoft Word, Excel, Outlook), in Games (Solitaire, Minesweeper) and in other software. Microbe Microbe Description: Microbe is an excellent music player that combines audio/video, picture gallery, and web browser. What makes it so unusual is the ability to do your browsing while listening to music. Mini Linux Mini Linux Description: Mini Linux is a LiveCD with a graphical interface. WPS Office WPS Office Description: WPS Office is a FREE office suite for windows. It can be used at home or on your PC at work. Your Video CD Your Video CD Description: Your Video CD is a free CD based on FLOSS. WebTimeClock WebTimeClock Description: WebTimeClock is an easy to use, web based office time clock, which is suitable for small business or individuals. The web-based version has many more features than the desktop version. WebTimeClock is an excellent office time clock that can run under Microsoft IIS (included with Windows NT Server, Windows 2000, Windows XP, and Windows Server 2003) or Apache (with support for PHP, Perl, Java, and asp). Known Bug Tobaco Tobaco Description: Tobaco is a GTK+/GNOME based multitasking application similar to thunar. All features and functions are available, including mounting .iso file without need of 3rd party applications. Gift Manager Gift Manager Description: Gift manager is a stand alone application to store your gift cards and manage them with ease. Use it to either create a new gift card or scan an existing one. The gift cards will be stored in the database and will be easy to retrieve when needed. Nick Derex Online Game - Hacking is a special blend of art and science. This site is devoted to b7e8fdf5c8

SlaveMouse Crack 2022

SlaveMouse is an easy to use mouse control software that controls your mouse via predefined action-locations. The location of the mouse actions are determined by the way you are holding the mouse. When the mouse is held towards the left side of the keyboard it will move the mouse left, when it is held towards the middle of the keyboard it will move the mouse middle and when it is held towards the right side of the keyboard it will move the mouse right. When holding the mouse towards the left side of the keyboard there will be a left mouse action, when the mouse is held towards the middle of the keyboard there will be a middle mouse action and when the mouse is held towards the right side of the keyboard there will be a right mouse action. The GUI-Interface of SlaveMouse is very easy to use. You can simply select the location the mouse actions should be applied to and apply the selected action. All the mouse actions can also be saved as preset-actions so that you can apply them by simply pressing a button. Now you just have to select "Download new version" and it will be downloaded to your computer. There are five different motion types. They are run, move, click, doubleclick and zoom. The doubleclick is a very useful feature that will automatically repeat the last mouse-action that was performed when the mouse is placed on a predefined location. By default the mouse actions are run, move, right and left click actions. There are also text fields where you can type a text and a location for the mouse action to be performed. In the version 0.9.4 the relative mouse-locations were added. They make the application compatible with mouse-drivers that have shortcuts for relative mouse-locations like the Microsoft Windows DefaultMouse. Now it is possible to set the mouse-locations in a way that it is not possible to simply determine them. For example by holding a predefined mouse-location on the left side of the keyboard and moving the mouse from left to right the mouse will be moved backwards and forwards to the next location. With the version 0.9.4 it is also possible to create a mouse action to always move the mouse to the left side and just move it there. SlaveMouse Features: ⬜ Can be used in most all Windows versions. ⬜ No additional mouse driver required. ⬜ Can be used together with most all Windows programs. ⬜ Uses minimal system

What's New in the SlaveMouse?

SlaveMouse is a simple software that makes your mouse move and click automatically on locations that you defined. Limitations: ￿ The demo-version will only work for about 2 weeks. ￿ During this time only 10 mouse actions can be used. (The registered version has 100 actions) ￿ Each time you run the program it will stop after about 100 moves. SlaveMouse is a simple software that makes your mouse move and click automatically on locations that you defined.
